Dear Sir / Madam,

As I have **4 Years 6 Months of experience** in software development and automation, I am very excited to submit my CV for consideration to join in your Organization.

With a broad range of experience in disciplines such as application development and testing automation, I offer expertise in all the facets of Software development. In every Organization I have held, I have demonstrated high level of professionalism, a strong work ethic and very friendly with every colleagues of diverse cultural and socioeconomic background.

Kindly consider the below highlights, which further details my skills and qualifications.
- Earned a **Masters degree** in computer applications(MCA)
- From software development front, I have contributed in all the layers, front-end, server side and database(**Django - Full Stack Web Development**)
- I have sound knowledge in Quality Assurance as I have contributed automation of various application testing methodologies(**Python - Automation (UI / CLI / REST)**)

Sincerely,
Logeswaran G
